Objective

I am a highly motivated and goal-oriented individual with a strong passion for web development, seeking to leverage a keen interest in coding, design, and problem-solving to build innovative and user-friendly web solutions. I am skilled at staying up-to-date with industry trends and technologies, and determined to continuously develop expertise in front-end and back-end development. Committed to delivering high-quality, functional, and visually appealing websites while fostering collaborative teamwork and client satisfaction. I am looking to contribute my technical abilities, creativity, and dedication to a dynamic organisation focused on impactful digital innovation.

Education

- Life Choices Academy** 2024
Web Development
Web Development Certificate
- Nelson Mandela University** 2021 - 2023
Bachelor of Arts in Psychology
Bachelor's Degree

Experience

- Life Choices Studio** 25 September 2024 - Current
Web Development Intern
 - I collaborated closely with the development team to design, code, and test responsive websites, ensuring cross-platform compatibility and an optimal user experience.
 - I assisted in implementing front-end features using HTML, CSS, and JavaScript, which enhanced site navigation and visual appeal. •Additionally, I contributed to back-end development by utilising technologies such as PHP and Python to improve website functionality.
 - My role involved troubleshooting, debugging, and resolving technical issues.
 - I gained hands-on experience with version control systems like Git and actively participated in regular code reviews to ensure coding standards and best practices were upheld.
 - Collaborating with UX/UI designers and stakeholders, I helped translate project requirements into functional, user-centered web solutions. Furthermore, I optimised website performance by analysing page load times and implementing improvements.
 - To ensure project continuity, I also created and maintained technical documentation for workflows and coding processes.
- Dhk Architect** September 2019 - September 2019
Job shadowing
 - I worked in this company for 5 days, I supported the architectural team in designing and developing innovative building concepts that aligned with project requirements and client expectations.
 - I assisted in drafting architectural plans, elevations, and 3D models using software such as AutoCAD, Revit, and SketchUp, ensuring precision and attention to detail in all deliverables.
 - Collaborating with senior architects and project managers, I contributed to site analysis, feasibility studies, and the preparation of presentations for stakeholders.
 - I also conducted research on sustainable design practices and materials to integrate environmentally

friendly solutions into projects. •Additionally, I participated in on-site visits to monitor progress, assess construction alignment with design specifications, and document any necessary adjustments.
•This hands-on experience enhanced my ability to apply architectural principles and technical skills effectively in real-world scenarios.
